GENERAL INFORMATION.

WILLIAMSPORT DICKINSON SEMINARY.

Is an institution of high grade, with ample facilities for giving young ladies and gentlemen a superior education. It is organized upon the plans which have been approved by long experience, and adopted by the best schools in this country, embracing all modern appliances in means and methods of instruction. It was founded in 1848, and is regularly chartered by the Legislature of the state of Pennsylvania, and authorized to confer degrees upon those who complete the prescribed Courses of Study.

The Seminary is under the patronage of the Central Pennsylvania Conference, being owned and practically managed by the Preachers' Aid Society. As this investment was rather to promote the important work of higher Christian education than to make money, the paramount purpose is to combine thorough instruction and careful moral training with the comforts of a good home, at the lowest possible rates.

LOCATION.

Williamsport is one of the most beautiful and healthful places in the state. It has never been subject to epidemics of any kind. Many coming to the school in poor health have returned fully restored. The city is situated on the West Branch of the Susquehanna River, has a population of thirty thousand, is widely known for its intelligence, its enterprise, the taste displayed in the character of its public buildings and private residences, and the moral appliances with which it is furnished. In small towns and villages the facilities for culture—intellectual as well as aesthetic and moral—are generally limited, rarely reaching beyond the institution itself, and hence student life must become monotonous, lacking the inspiration which a larger place with wider opportunities affords. Forty churches, an active temperance organization, and branches of the Young Men's and Young Women's

BRADLEY HALL.

Christian Associations, embracing many of the most earnest Christians in the community, with a large library, free to all, and accessible at all times, indicate some of the social and religious advantages accessible to the young people in Williamsport.

BUILDINGS.

The buildings occupy an eminence overlooking the city, and are surrounded by beautiful shade trees, while the grounds contain six acres, affording ample room for exercise and play. The buildings are brick, heated by steam, provided with fire escapes, and supplied throughout with pure mountain water. They are lighted with electric incandescent light. The system adopted embodies the latest improvements in generating and utilizing electricity for illuminating purposes, and insures entire safety from fire or shock, so that the wires may be handled without danger. The value of an illuminant which, consuming no oxygen, leaves the air perfectly pure and at the same time furnishes abundant light, cannot be overestimated.

The main edifice, recently rebuilt and improved, compares favorably with the best school buildings in the country, and the new Chapel is among the most attractive public halls in the city.

Both departments are furnished with bath rooms and all modern appliances for comfort, and in the entire arrangement of the buildings great care has been taken for the convenience and health of the occupants.

The ladies' apartments are entirely separate from the others, *and there is no association of the sexes but in the presence of their instructors.* The happy influence, *mutually exerted*, in their slight association in the recitation room, at the table, and in the public exercises in the Chapel, is to be seen in the cultivation of a cheerful and animated disposition, in the formation of good habits and manners, in ardent devotion to study, and in the attainment of high moral character. These, with many other valuable results, have established the

fact that the best plan for a school is, according to the evident design of Providence in the constitution of society, on the basis of a well-regulated Christian family.

The members of the faculty live in the building, eat at the same tables, and have constant oversight of all the students.

BRADLEY HALL.

The new Music and Art Building, named for Hon. Thomas Bradley, of Philadelphia, is an imposing structure, eighty-five feet long, fifty feet deep and four stories high. In architectural design and symbolic ornamentation it represents a very high type of utility and beauty.

This commodious building is a part of a long-cherished purpose to provide a modern Music and Art conservatory which, in equipment of space and appliances, as well as in method and character of work, shall meet the increasing demands for wider opportunity and broader culture in what has come to be esteemed an important factor in the higher education of young people. We offer advantages for the study of music, vocal and instrumental, which compare favorably with the best music schools in this country, with the atmosphere of a high-toned literary institution and the safe-guard of a refined Christian home.

Our Directors and assistant teachers have studied abroad, as well as in the best schools in this country, and are thoroughly conversant with the latest and best methods of instruction.

While chiefly devoted to the study of Music and Art, provision is made in Bradley Hall for a large and well-furnished gymnasium and bowling alley, for young ladies, with lockers, baths and all modern appliances for health and comfort added, as also a capacious Society Hall, a reading room and library. It is joined by an enclosed bridge with the main building of the Seminary, affording them easy and sheltered communication at all times.

HEALTH.

The value of physical culture is recognized. A large Cam-

pus, with very fine ball and lawn tennis grounds for the gentlemen and lawn tennis court for the ladies, furnishes stimulus and opportunity for out-door athletic sports.

An efficient Athletic Association is organized among the students, under the direction of a Professor. A public entertainment is given in behalf of the Association once a year. A Gymnasium, forty by sixty feet, supplied with the best modern appliances for physical culture, is maintained for the use of the gentlemen, under proper regulations. All young men, not physically incapacitated, may be required to take systematic exercise in the Gymnasium from two to three hours per week. They will provide themselves with an appropriate gymnasium suit, including shoes.

Lectures on health will also be given from time to time, by an eminent physician.

ROOMS AND FURNITURE.

The rooms are larger than in most boarding schools, the ladies' being 16x13 feet and the gentlemen's 20x9 1-2 feet. They are all furnished with bedstead, mattress, table, chairs, wardrobe, washstand and crockery; the ladies' with bed-springs and dressing-bureau, *and if desired*, any room will be entirely furnished; but students may provide their own sheets (for double beds), pillows, pillow cases, blankets, counterpanes, carpets and mirrors, and thus lessen the expense.

EXPENSES.

Total cost of boarding, washing, heat, light, tuition in regular studies, and room furnished, except carpet and bed clothing, per year \$212.40, as follows:

Fall Term	\$84.96	
Winter Term	63.72	
Spring Term	63.72	
		\$212.40
Church Sittings—per term	\$.50	
Gymnasium—per term50	
General Chemistry—per term	3.00	
Qualitative Analysis—per term	4.00	

Without tuition in any department:

Fall Term	\$67.63
Winter Term	50.72
Spring Term	50.72

When rooms are entirely furnished, \$13.00 will be added per year, or \$6.00 per term, for each student. This includes all charges for furnished rooms, board, washing (12 plain pieces per week), heat, light, and tuition in Latin, Greek, Literature, Mathematics, Sciences, Ethics, English and Penmanship. *There are no extras whatever.* The charges for Music, Art, Modern Languages and Bookkeeping are stated elsewhere.

We desire to emphasize this statement, because some schools, whose advertised rates are higher than ours, increase the expenses still more by numerous "extras."

We ask those who are seeking education for themselves and parents who contemplate sending their children to a boarding school, to carefully note the fact that we furnish everything embraced in a thoroughly equipped school, with all the comforts of a good home, including a large, airy and *completely furnished* room, in a beautiful and healthful location, at the low rate of \$225.40 per year, in courses of study which prepare the student for business, for professional life, or for the lower or higher classes in college; or, if they prefer to furnish their own rooms with bed-clothes and carpet, for \$212.40.

Persons applying for rooms will please state whether they wish them furnished entirely or in part.

DISCOUNTS.

Special discounts are made on all bills, except tuition in Ornamental Branches, when two enter from the same family at the same time; to all Ministers; all persons preparing for the Ministry or Missionary work, and all who are preparing to teach.

PAYMENTS.

Term bills are payable in advance, one half at opening and the balance at the middle of the term.

Fifteen per cent. will be added to the ordinary rate per week for board, washing, heat, light and room, when students leave before the end of the term. *No reduction or discount in boarding or tuition for less than half a term, nor furnished room for less than a term. Nor will there be any reduction for absence during a term except in case of protracted illness.*

Extra washing, ordinary pieces, 50 cents per dozen; ladies' plain gowns, 20 cents each.

Meals in dining room after regular table, 10 cents extra.

Meals carried to rooms, in case of sickness, 10 cents each, or 25 cents per day.

When students are called away by sickness or providential necessity, moneys advanced will be returned, subject to conditions stated above. Students dismissed or leaving without the approval of the President *may* be charged for the full term.

Deduction for absence is made on recommendation of the President to the Treasurer.

No reduction for board or tuition for absence of two weeks or less at the beginning, or the last four weeks before the close of the term.

Five dollars must be deposited by gentlemen and two dollars by ladies with the Treasurer on entering, to cover damages that the student may do to room or other property. This will be returned when the student leaves, but not before, in case no injury has been done. Any student rooming alone will be charged \$10.00 extra per term.

DAY PUPILS.

Day pupils in Primary branches will be charged \$10.50 for Fall Term and \$8.00 for Winter and Spring Terms each; in Higher branches \$20.00 for Fall Term and \$15.00 for Winter and Spring Terms each.

ADMISSION.

Pupils of good moral character will be received at any time, for a single term or longer period.

Must arrange bills with the Treasurer before attending recitations.

Must take at *least* four studies, unless excused by the Faculty.

Must register name and church, and agree to comply with all rules and regulations of the school.

Each student will be considered a member of the Institution until due notice shall have been given of intention to leave and permission obtained from the President.

BOARDING.

This department is under the general direction of the President, but an experienced and thoroughly competent Matron has immediate charge. The department commends itself by cleanliness, abundance of supply, excellence of quality, good cooking, and adaptation to health.

DISCIPLINE.

The discipline is firm, but mild and impartial. While every encouragement will be given to the orderly and studious, and due allowance be made for youthful indiscretion, yet the lawless and refractory cannot long remain among us.

APPARATUS.

The Scientific Department is furnished with very complete outfits of Physical and Chemical Apparatus. The Museum contains a large number of rare and valuable specimens, including a fine collection of Minerals and Zoological and Physiological specimens. Among these are the following :

In the Museum—

Alcoholic specimens of the Human Heart, Brain, Stomach, Kidneys and Intestines.

Bock-Steger Models of Ear, Skin, Eye, Larynx, Alimentary Canal, Lungs, Head, Brain and Tongue.

A finely articulated Human Skeleton is accessible to the classes in Physiology and Anatomy. A valuable collection of Microscopic Slides has been presented for the use of the Department.

A series of Drill ores, a collection of different Woods in the form of blocks, showing bark, grain and finished surface, and a collection of Polished Granite specimens.

In Physical Apparatus—

A Holtz Machine, Gold Leaf Electrosopes, Pith Ball Electrosopes, Ruhmkorff Coil, Morse Key and Register, a model Telegraphing Machine, Queen's superior Air Pump, two large Globes, Still, furnishing distilled water for all work in Chemistry, Oxyhydrogen Light with all accessories, and a Queen's Excelsior Lantern.

In Chemical Apparatus—

Pair delicate Balances, sensitive to one milligram, Assay Furnace, full set of Pipetts, Burets and Graduates for Volumetric Analysis.

Miss Myrtle Gray, of the Class of '93, presented a large collection of rare Botanical specimens, gathered in Kentucky and mounted for use in the study of Botany.

POST-GRADUATE WORK.

We are prepared to do post-graduate work in Modern Languages, Music, Art, Chemistry and Physics.

MERIT AND DEMERIT.

A daily record is kept of all the exercises of the school, from which record the students will be graded. A record of demerits is also kept. Tardiness, unexcused absences from required exercises, and all disorderly conduct, will subject the student to demerit marks. Such marks bring a private reproof before the Faculty, a public reprimand before the whole school, and may send the offender away. Sessional reports are sent to parents.

GOVERNMENT.

Our system of government seeks to encourage self-control rather than control by statute law and rule. It deals with each one as an individual, as well as a part of the school, making each one largely the arbiter of his own immunities and limitations. This principle will be emphasized in the coming year.

Manliness and womanliness manifested in a uniform recognition of relations to school and school life; appreciation of what opportunity means as a value and factor in the acquisition of learning and culture, and courteous, straightforward, truthful dealing with teachers and fellow-students in matters pertaining to mutual associations in the life and work of the school, will earn and obtain such privileges as properly consist with the purpose for which school life is desired and maintained.

But indolence, evasion of duties implied in the relations of student and school, unmanly or unwomanly attitude toward the life assumed in entering the school, and especially equivocation or prevarication in statement, bearing or living, will be treated as weakness or positive vice, imposing such correctives and limitations as each individual case may demand.

HONORS.

No student whose deportment is unsatisfactory will be allowed to contest for class honors.

RELIGIOUS CHARACTER.

Williamsport Dickinson Seminary is not sectarian in any sense, but it is positively and emphatically Christian in its administration and work. By combining practical Christian teaching with thorough intellectual training, under the personal supervision of Christian men and women, especially qualified by education and experience, the school has established a reputation among literary institutions and has won the confidence of the public in a degree of which its friends and patrons may be justly proud.

RELIGIOUS SERVICES.

Every boarding student is required to attend religious services in the Chapel daily, as well as public worship morning and evening every Sabbath, *at such place as parents or guardians may designate*, the President assenting, unless excused.

A Bible reading, conducted by the President, will be sub-

RECEPTION ROOM.

stituted for the evening service as often as may be deemed proper.

N. B.—Each student must be supplied with a Bible, to be read, *without note or sectarian comment*, in the services of the Chapel. The whole school read in concert.

To promote the spirit of worship, we advise each student to procure the Hymnal of the Methodist Episcopal Church, which is used in the Chapel services.

A general experience meeting is held every Sabbath at half-past eight A. M., and generally a service of song at six P. M., continuing one hour. Also, a prayer and praise meeting for the ladies and gentlemen on Wednesday evenings. Attendance upon these social services is optional with the students.

RELIGIOUS ORGANIZATIONS.

A Young Woman's Foreign Missionary Society has been in successful operation for several years. This society acquires and diffuses missionary intelligence, creates and maintains an interest in the work of the General Society and prepares its members for efficient service as centres of Christian influence at their homes when school days are ended. It has largely contributed to the education of a missionary for India.

CANDIDATES FOR THE MINISTRY.

A preacher who can, when necessary, conduct the singing in a prayer meeting and in a revival service, acquires a power for good which cannot otherwise be attained. Indeed, the usefulness of a preacher is largely augmented by a knowledge of music and ability to sing. Recognizing this fact, we have arranged to give weekly lessons in singing and careful instruction in voice culture to all young men who are preparing to preach, at the nominal cost of *one dollar per term*. This provision also includes young women who are preparing for either home or foreign missionary work.

STUDENTS OF LIMITED MEANS.

We have organized a system by which a limited number of students may earn a part of the cost of education.

We now give light employment, not appreciably interfering with study, to seventeen young men and three young women, paying from fifteen to twenty-five per cent. of the bills. Applicants for these positions are enrolled and vacancies are filled in the order of application, preference being given to those in the school. Applicants must be recommended by their pastor, or some responsible person, as worthy of help. No one will be retained who is not earnest in his studies and faithful to all required duties.

LITERARY EXERCISES.

In addition to class work, public exercises are held in the Seminary Chapel every Friday evening, at which the Juniors and Seniors in literary courses read essays or deliver original speeches, interspersed with vocal or instrumental music, furnished by the Music Department.

LITERARY SOCIETIES.

There are three flourishing Literary Societies connected with the Seminary—the Belles Lettres, the Gamma Epsilon and the Tripartite Union. The first two are in the gentlemen's and the last in the ladies' department. Each has a well-furnished hall and a judiciously selected library, aggregating more than two thousand volumes.

HOME FEATURES.

The Seminary is a boarding school of the highest grade, taking rank among the very best, with superior appointments and appliances for the health and culture of its students. It is also a well-ordered home. First of all, the President and his family reside in the building, forming a part of the school and are always accessible to all its members. The wife of the President entertains the Young Woman's Missionary Society once a month in her apartments, and occasionally receives the entire school in her parlors, while in times of sickness she visits the students in their rooms, giving such suggestions and directions as the experience of a mother may supply. Again, the members of the Faculty are so distributed through-

out the building as to be readily accessible at any time for such help as the students may desire outside of the recitation room. Again, recognizing the value of social culture as a factor in preparation for a useful life, the President and the Faculty give a formal reception once each term to the whole school in the Chapel, which for the occasion is transformed into an attractive drawing-room, while weekly informal "socials," continuing from thirty minutes to an hour, after the public Friday evening entertainments, relieve the monotony of routine work, cultivate a cheerful spirit and meet the natural desire for social pleasures. In these and all practicable ways an appeal is made to the higher elements in the nature; mutual interest inspires mutual respect; opportunity is afforded to study character, and the school becomes a pleasant and safe Christian home, as well as a place for careful mental and moral training.

INSTRUCTION.

Our methods are modern, and adapted to the need of the students. No pains are spared to give thorough, practical and scholarly training in all the departments by teachers of superior attainments and experience. Besides instruction in connection with the text book, lectures illustrated by experiments are given from time to time.

Students in Music have opportunity to hear distinguished artists, which is of great advantage in acquiring a correct taste, as also in enlarging their knowledge. In addition to frequent Recitals by musicians of recognized ability, eminent musicians from a distance frequently give concerts, to which our Music pupils are admitted at reduced rates.

SPECIAL LECTURES.

Special lectures in the form of familiar talks will be given each term by the President. These lectures will cover the discussion of social ethics, the care of health, how to eat, how to work, how to play, how to rest, current literature and current events in relation to school life, with other subjects which

may be helpful to young people who wish to make the most of opportunity.

The President will also give a course of lectures to young men preparing for the ministry, covering such themes as may be of value to them as preachers, as pastors and as citizens. Attendance at these lectures is required of all candidates for the ministry.

YOUNG LADIES.

Constant and systematic efforts are made looking toward the general culture of the young ladies committed to our care. The lady members of the Faculty take personal interest in all things pertaining to their welfare and are intimately associated with them in recreation hours.

Every Saturday short lectures are given to all young ladies on social culture, literature, art and kindred topics. During the coming year, in addition to these lectures, the ladies of the Senior Class will meet the Preceptress monthly for purposes of literary criticism.

TELEGRAPHY.

Among the physical apparatus are several telegraphing instruments, one of which, the gift of Benjamin G. Welch, is a very fine model, showing the various parts of different instruments. During the year a number of instruments have been placed in students' and teachers' rooms, affording excellent opportunity for study and practice to those who desire to fit themselves for practical work in this growing branch of industry.

TEACHERS.

A Normal Class may be organized during the Fall and Spring Terms for those who desire to teach. The Course will comprehend special instruction by lectures on the Theory and Methods of Teaching by the President. *No extra charge will be made.*

SCHOLARSHIPS.

Mr. DeWitt Bodine, of Hughesville, Pa., an alumnus of the Seminary, has the honor of founding the first full scholar-

ship in this Institution. It is to be filled from the public schools of Hughesville by competitive examinations and is designated

"THE DEWITT BODINE SCHOLARSHIP."

It pays all expenses of board, tuition, etc., in any regular course of study.

Who will imitate Mr. Bodine's example? Are there not generous men and women among our alumni and friends ready to invest a portion of their wealth where it will be secure and work for God forever? A comparatively small sum will do a large work. The interest on a thousand dollars, in many instances, will supplement the meagre resources of a worthy young man or woman whom God has given large ability, but from whom fortune has withheld the means to develop it. This is especially true of those who are called into the ministry or into missionary work. Any sum will help, and three thousand dollars will found a ministry or missionary scholarship in this Institution and maintain it perpetually.

To aid any one who may desire by gift or will to found a partial or full scholarship to assist worthy young men or women in preparing for the ministry or mission work, or for any other useful occupation, forms are appended which may be used:

I give, bequeath and devise to the Williamsport Dickinson Seminary, located at Williamsport, in the county of Lycoming, state of Pennsylvania, the sum of ——— dollars (if stocks, bonds or other personal property specify same), to be used for the purpose of (here state definitely the object for which the money or property is to be used); said corporation to have and to hold and to employ the same for the purpose above named, and the receipt of the Treasurer thereof shall be a sufficient discharge to my executors for the same.

If real estate is to be given this form will answer: I give, bequeath and devise to the Williamsport Dickinson Seminary, located at Williamsport, in the county of Lycoming, state of Pennsylvania, the following lands and premises (here describe

definitely); to have and to hold, to said corporation, its successors and assigns forever, the proceeds of which shall be employed in (here describe the object).

The Woman's College of Baltimore proffers annually four free scholarships, valued at \$100 each, to any four young ladies of the graduating class who, after examination, shall be recommended by the President and Faculty of the Seminary. This scholarship continues in each case through four years, giving free tuition in any degree course.

OUTFIT.

The gentlemen should be provided with an umbrella, and a pair of slippers to be worn in the room. The ladies must be supplied with thick walking shoes, and umbrella, India-rubber overshoes, water-proof cloak and a suit for exercise in the gymnasium. Their attire for general use should be neat and simple, but not elegant or expensive. *All wearing apparel must be plainly marked with full name of the owner.* We suggest that in addition to towels, napkins and napkin ring, each pupil bring a knife, fork and spoon, *for use in case of sickness.*

A WORD TO PARENTS.

1. Try to have your children here on the first day of the term, *but not before*, as we shall not be ready to receive them. The classes are formed on the second day, and it will be better for all concerned that the student start regularly with his class.

2. If possible do not call them away during the session. When called home during the term the time of going and returning must be specified in the request. Absence, if only for a few days, disarranges the class, and is generally the beginning of irregularity on the part of scholar.

3. Do not allow your children to leave the school before the examinations, unless it cannot be avoided. Serious inconvenience to all concerned often arises from a neglect of this caution.

4. Supply them *very sparingly* with spending money. Parents cannot be too cautious on this point.

5. Select for your child one of the instructors as a patron, to distribute his funds. In this way a more judicious use of your money will be made, and your child will be kept from many temptations.

DAY STUDENTS.

Day students will be required to observe the following rules:

1. Attend Chapel exercises, when their recitations come at 8 or 9 o'clock A. M., unless excused by the President.

2. Spend the intervals between recitations in the Study Hall.

3. Present written excuse from parent or guardian for all absences, time and number of recitations being specified.

4. Must not visit the rooms of boarders at any time without permission.

5. All day students must deposit \$1.00 with the Treasurer when they enter, to cover damage done to Study Hall or other property. This will be returned when the student leaves, but not before, provided no injury has been done.

MEANS OF ACCESS.

Williamsport is eight and a half hours from New York, six hours from Philadelphia, nine hours from Pittsburg, six hours from Baltimore, three hours from Harrisburg, and three hours from Elmira, and is reached directly by the Pennsylvania, the Philadelphia & Reading, the Northern Central, the Philadelphia & Erie, the Beech Creek and the Fall Brook railroads, which pass through the city, and as these have connections directly with all the great railroads, is readily accessible from all quarters.

GRADUATES AND FORMER STUDENTS.

It may safely be estimated that from ten to twelve thousand persons have received Academic instruction, covering from one to four years, in Williamsport Dickinson Seminary,

while seven hundred and sixty-one have completed the prescribed curriculum, graduating with the degrees the Institution confers. We desire to bring all these into active sympathy and co-operation with their *Alma Mater*, and hence we ask all persons to whom this notice may come, who have been students here, to send us their address, with any information concerning their personal history that may be of general interest, as we wish to compile a complete catalogue of all the students now living.

There is a general meeting of the Alumni every year, the day before Commencement. We extend a most cordial invitation to all old students to attend the meeting this year, which will be held June 15, in the afternoon and evening. If you cannot come let us hear from you by letter.

And now, may we not ask you to aid in enlarging the sphere and increasing the power of our *Alma Mater*? You can do much in many ways, but you can at least direct those looking for a good Boarding School to ours, or send us their address on a postal card. Carry the Seminary in your heart. She is doing a worthy work, and earnestly asks her sons and daughters to help her.

SPECIAL INFORMATION.

We shall not be ready to receive students before the first day of the term. On the second day classes are formed, a term schedule for recitations adopted, and lessons assigned.

Students from other schools may enter any class on passing a satisfactory examination in the previous studies of the Course, or their equivalents. The examination may be waived if the Faculty are assured, by certificates of scholarship, or otherwise, that it is unnecessary. Certificates must be presented within two weeks after admission.

Invitation to visit any member of the school may be given only with the approval of the President. The person inviting or entertaining a visitor will be charged twenty-five cents

A. G. BUSHNELL, 111 MASSAU ST., N. Y.

STUDIO

per meal, except parents or brothers or sisters of the person inviting.

Visitors will not be allowed on the halls nor in the rooms of students without permission.

Students who are back in more than three studies in any year will not rank with the class of that year unless they have completed equivalent advanced studies.

German, covering three years, may be substituted for Greek in the College Preparatory Course.

The Junior and Senior Classes study Etymology during the Fall Term.

The language "elected" in the Courses in Science and Literature and Practical Science will be retained throughout the required two years.

The ladies are allowed to substitute a Course in Music, Drawing and Painting, German or French, for the Greek Language, and for Analytical Geometry and Calculus.

The gentlemen may substitute two years in Greek or German for Analytical Geometry and Calculus.

The election or substitution of German, French, Music or Drawing and Painting does not remit the regular tuition for these branches.

Orthography, Etymology, Reading, Composition and Declamation are required of all students, except those exclusively in Music, Art and Elocution.

The classes in Trigonometry and Surveying are given such field drill as will familiarize them with practical surveying.

In the departments of Ancient and Modern Languages the classes are practical in oral and written exercises throughout the Course.

The study of the English Bible, one lesson a week, is required in all Literary Courses.

Essays by the young women and speeches by the young men, one each term, delivered at the regular Friday evening exercises, are required as a part of the Literary Courses.

Special examinations in Orthography will be held the second week of each term. All students failing in this examination will be required to take a special course in spelling.

COURSES OF STUDY.

In order to meet the wants of a larger class of students, nine regular Courses of Study are provided, namely: The Normal English, Belles Lettres, Science and Literature, Classical, Practical Science, College Preparatory, Art, Music and Business. Students may adopt any of these Courses exclusively, or may select such studies from them as they desire, subject to the approval of the Faculty.

The Normal English is designed to meet the increasing demand for teachers in our Common Schools, and is heartily commended to young ladies and gentlemen who desire thorough instruction and drill in the English Branches.

The Belles Lettres Course is especially arranged to accommodate young ladies who may wish to omit the Higher Mathematics beyond Elementary Algebra and Geometry. It thus affords opportunity to connect studies in Music and Art with a well-selected Course in Literature and Science.

The Course in Science and Literature is intended to give wider culture and more thorough mental discipline. It differs from the Classical Courses mainly in that it omits the Greek Language entirely, and makes Latin elective with German or French during the first two years. Before entering upon this Course the Student must be thoroughly acquainted with the Common English Branches.

The Classical Course is much more extensive than is ordinarily pursued at Seminaries. It will compare favorably with the curriculum adopted by our best institutions of learning. We offer it with entire confidence to young men who are preparing for professional life; also to young ladies who aspire to superior intellectual culture. The preparation for this Course is a thorough knowledge of the studies embraced in the Academic Course.

The Practical Science Course covers the required preparation for admission to schools of Technology and to Industrial Courses in our best Universities and Colleges. However, it is specially arranged to meet the increasing demand for scientific and literary instruction by those who contemplate an Academic training. As a preparation for assured success in industrial occupations we heartily commend it.

The College Preparatory Course is arranged for those who desire thorough instruction and systematic drill in all branches requisite for admission to our best Colleges and Universities. We commend it especially to parents who wish to place their children under the watchful care of experienced teachers, while they receive the literary culture of a high grade institution of learning and enjoy the social advantages of a well-regulated Christian home.

ACADEMIC COURSE.

This Course will give thorough instruction and drill in the Common English Branches, and also prepare the Student for admission to the higher Courses. Classes are formed each term for beginning and advanced Students in Arithmetic, Grammar, Geography, History, Algebra, Geometry and Latin.

COURSES IN READING.

A knowledge of Literature is a requisite of general culture, yet observation has shown that no branch of education is more neglected. The majority of Students devote little time to a course of collateral reading, and consequently leave school without a well-defined taste for literature. To promote a correct use of the English Language, to enlarge the vocabulary, to develop a love for books, and to serve as an introduction to the English Classics, is the purpose of this Course.

To present a graded scheme in the study of literature is impossible, but the aim of this plan, which extends through four years, is, first, to gain the attention of the Student by a pleasing narrative and then gradually to advance him to more solid subjects.

Two works are read each term, except in the Academic and Sophomore years, and an examination is given on each work, one at the middle and the other at the end of the term. The examination covers the general points of plot, style, idiom and vocabulary.

Students in the College Preparatory Course will be examined in the works required for entrance by the New England College Association, which are as follows:

For 1899: Dryden's Palamon and Arcite; Pope's Iliad, Books I., VI., XXII. and XXIV; The Sir Roger de Coverley Papers in the Spectator; Goldsmith's Vicar of Wakefield; Coleridge's Ancient Mariner; DeQuincey's Flight of a Tartar Tribe; Cooper's Last of the Mohicans; Lowell's Vision of Sir Launfal; Hawthorne's The House of the Seven Gables.

For 1900: Dryden's Palamon and Arcite; Pope's Iliad, Books I., VI., XXII. and XXIV.; the Sir Roger de Coverley Papers in the Spectator; Goldsmith's The Vicar of Wakefield; Scott's Ivanhoe; De Quincey's The Flight of a Tartar Tribe; Cooper's The Last of the Mohicans; Tennyson's The Princess; Lowell's The Vision of Sir Launfal.

Any Student preparing for any particular college will be examined in the work prescribed by that college, upon application. The total cost of all books in these Courses does not exceed fifty cents per term.

COURSES IN MUSIC.

The aim in this department will be to give thorough instruction, both in the technique and the aesthetics of the art; and to this end only standard text-books and studies will be used. Students completing the Course will receive a Diploma.

THEORETICAL.

Emery's Harmony; Counterpoint; History of Music (Filmore); "How to Listen to Music," (Krehbiel); Principles of Expression, (Christiani).

An opportunity for practice in singing, sight-reading and cultivation of musical taste, is given in the Chorus Class, which meets twice a week. This year they have studied selections from Handel's Messiah, Haydn's Creation, Daniel by Root, Rose Maiden by Cowen and Part Songs.

Students may enter the Courses in Instrumental or Vocal Music at any point for which they are prepared, and are advanced according to their ability and proficiency, not according to the number of terms taken.

All pupils who wish to complete a Course of Study on the Piano or in Vocal must be able to pass a satisfactory examination in Harmony.

Students not wishing to take the Graduating Piano Course may take a Course on the Reed Organ, selected by the teacher, and will be granted a diploma, if they acquire ability in reading ordinary church music at sight, and in a manner sufficiently clear for purposes of accompaniment.

Before graduating in Piano Course the Student will be expected to give a public Recital.

A full Course of Violin Playing has also been prepared for the benefit of those who are seeking superior attainments in this department.

All Music Scholars have Vocal Culture free of charge, in classes. Attendance at Lectures on Composers required.

COURSE IN ART.

This department is under the direction of a lady of rare ability and wide culture. Having added to the usual Art Curriculum of a Seminary the regular course at a School of Design, she is thoroughly qualified to meet the most rigid demand for instruction in both the useful and ornamental branches of the department.

The Course in Drawing comprises Linear, Perspective, Object and Model Drawing. Due attention is given to the branches of Pastel, Crayoning and China Decorating—Portrait Crayoning being a specialty. The course in Oil embraces Landscape and Portrait Painting.

Students desiring a full course in this department will, upon satisfactory advancement in all its branches, be entitled to a diploma.

In case of sickness or unavoidable absence, lessons missed will be made up, if the teacher is notified beforehand.

ELOCUTION.

Elocution is recognized as a most important branch of education. This department is under the supervision of a thoroughly qualified and experienced teacher, and will include a careful vocal drill, and practice in the entire range of expression. It will also embody such a variety of Recitations and Readings as may serve to exemplify the qualities and modulations of the voice, and will cover gesture and action.

Students are examined physically when admitted to the gymnasium, and then systematically prepared, by a series of exercises, for intelligent use of the apparatus.

BUSINESS DEPARTMENT.

This Course is designed to give a thorough knowledge of the principles of business transactions. It may be pursued alone or in connection with other studies, thus accommodating those seeking a

literary as well as those seeking only a business education. The time required to finish it will depend upon the proficiency of the pupil in the English branches, and the diligence with which he works.

STUDIES.

The Course will include instruction in the Common English branches, Book-keeping, Single and Double Entry,—Business Correspondence, Business Papers of various forms, Civil Government and Political Economy.

TUITION.

Students may enter the regular classes without additional cost for tuition, except for Book-keeping, for which \$5.00 per term of three months will be charged.

Board, Room, Washing, etc., same as in other departments.

ADVANTAGES.

This department offers all the opportunities for general culture afforded Students in other departments, assured by well-conducted literary societies, lectures, large libraries, association with experienced teachers, and the refining influences of a Christian home.

ADMISSION.

Students may enter this department at any time in the Academic year, a fair knowledge of the English branches being the only requisite.

METHODS OF INSTRUCTION.

The instruction in the Primary Department is based on the inductive and objective methods, classes having objects presented which are studied analytically. Julia McNair Wright's Nature Readers have been introduced, where life is seen in its natural development. Practical application of the "natural method" and the facts obtained from the Readers is made in conversational lessons. The language lessons embrace Memory Lessons, Dictation Exercises, Stories read for Reproduction, Exercises in Letter Writing, Word Pictures and Composition Writing. Especial attention is given to Arithmetic and the analysis of problems. History and Geography are taught with the aid of maps, books of reference and the best text-books. Information Lessons, or elementary science studies in Natural History, teach the classes to observe and to make careful note of the objects of the animal, plant and mineral kingdoms. The methods of study consist chiefly in examination of leaves, rocks and insects. The series of Supplementary readers include writings of the best literary and historical authors.

Instruction in Elocution and Physical culture is given by the teacher of these branches. The teacher of Vocal Music has organized a chorus class for the pupils in this department.

In Elementary Arithmetic, Grammar and Geography the catechetical method is largely employed, but in Higher English the same course is adopted which prevails in the more advanced branches of study. The pupil is taught to study the text-book by topics rather than by sentences or paragraphs, and encouraged in the lecture room to give the substance of what he has learned, in his own language. In this manner, while he is adding to his store of knowledge, he is enlarging his vocabulary, and while he is evolving principles and acquiring facts, he is increasing his power of expression, and thus unconsciously, it may be, but nevertheless surely, he lays the foundations of an easy and concise style of composition.

In English and American Literature, the origin of the English language and the growth of the literature are carefully traced. In this work the most interesting facts in the lives of the best authors and their principal productions are brought under review.

Instruction in Mental Science covers the second and the third terms of the Junior year. It embodies definitions of the mental faculties, and careful analysis of intellectual processes, with a brief history of the science, the main purpose being to stimulate the Student to think and investigate for himself.

Ethics, Logic and Political Economy are taught in the Senior year. Text-books are used and daily recitations are required. Class inquiries and discussions are encouraged, and familiar lectures are given from time to time by the teacher.

NATURAL SCIENCE.

In the department of Natural Science the underlying aim is to teach the Student to think and observe for himself, and at the same time to give him such a fund of practical knowledge as will fit him for the active duties of life. In all the branches the text-book is used as a means to gain a knowledge of topics rather than to be studied as an end in itself, and as far as possible the Student is led to the study of the objects themselves. No pains are spared to cultivate habits of clear, accurate and systematic thought and expression.

Geology is taken during the first term of the Senior year. A practical knowledge of the common rocks and minerals is acquired, and excursions are made to quarries and regions which illustrate various geological formations. Each Student makes a written report and collects characteristic specimens and fossils, and constructs of these specimens, dressed down and mounted in plaster of paris, a model representing an ideal arrangement of the seven different geological formations, fossil-bearing, admirably presented to view by outcrops within a few miles of the Seminary.

An Elementary Course in Biology is pursued in the Spring Term of the Senior year, in which thorough preparation is made for technical advanced work. The simpler laws of life are taken up and practical study is made of the fern, earthworm and frog. The oyster, crab and cat are also dissected and the general relation in structure and physiology of plants and animals is carefully brought out.

Physics embraces two terms of the Junior year. Mechanics, Sound and Heat are taken in the Fall Term; and Optics, Electricity and Magnetism in the Winter. The principles and laws are illustrated as far as practicable by apparatus. The relation between the different branches is held strongly before the mind, and practical questions, drawn from everyday life, are constantly brought forward to teach the Student to apply the principles learned in the text-book. The subject of Electricity is presented by a series of experiments and lectures, on which full notes are made by each Student.

In Botany, the laboratory method is followed. Compound microscopes are accessible to the class and each pupil is provided with a powerful lens and apparatus for plant dissection. The work is taken up in the following order: Organs of Plants, growth from seeds, root, stem, leaf, flowers and fruit; Natural Groups of Plants, with especial studies of Algae, Fungi, Muscineae, Filicineae, etc.; Gymnosperms, Monocotyledons, Dicotyledons, with studies of special types under each heading.

The study of the plants themselves, their physiology and anatomy, is made the important thing rather than plant analysis. Lectures on the various plant relations are frequently given. A valuable collection of Botanical specimens has just been presented by Miss Myrtle Gray, of Russellville, Ky.

Chemistry occupies the second and third terms of the Senior year. During the Spring Term there is also elective work in Analytical Chemistry. The chemical laboratory has been fitted up and is fully equipped with apparatus and chemicals for advanced technical work. The room is furnished with individual tables, each supplied with gas, Bunsen's burner, ring stand, water, case with full set of re-agents, and all necessary apparatus for illustrative experiment and qualitative analysis. There is also a complete set of apparatus for volumetric and gravimetric analysis and assaying. In the regular work Shepherd's Chemistry is used. Each Student keeping full notes on the experiments which are performed individually, becomes thoroughly familiar with chemicals and manipulations. In the Spring Term mineralogy is taken up in the laboratory work. Qualitative analyses of alloys and commercial articles are made, after which quantitative analysis, both volumetric and gravimetric, is taken up. Estimation of ores by these processes and assaying, and analyses of milk, sugars and mineral waters are made.

A dark-room has been built and furnished with a complete photographic outfit, and photography is taught during the Spring Term.

Lectures on subjects of interest to the department are given from time to time, illustrated by stereopticon views projected by a new oxy-hydrogen light.

ANCIENT LANGUAGES.

In the departments of Greek and Latin, scrupulous attention is given to the grammatical structure of these languages, their relation to English, the illustration and application of principles, accurate translation, and to the literary significance of each author studied. Mythology and Classical Geography are studied in the Senior year. It is aimed to give the Classics by these means their proper place as an aid to expression, to a thorough knowledge of our own language and to the pursuit of other languages, as well as to afford the usual mental discipline. Careful attention is also given to those preparing for college or for professional study.

MODERN LANGUAGES.

During the first year in German, classes complete Otis' Elementary Grammar, as far as the subject of Syntax, with study of Irregular Verbs, committing to memory all conversations, proverbs and selections. In second year Syntax of Otis' Grammar is completed, with frequent dictation exercises. Several standard novelettes are used for acquiring facility in sight reading. Meissner's German Conversation is used daily. The Spring Term is given to a study of Schiller's Works.

During the first two terms in French, Peiffer's Progressive French Drill Book is used, many short extracts being committed to memory. In the Spring Term there is a study of Keetel's Elementary Grammar through the subject of Irregular Verbs, careful attention being given to the idiom of the language. Also some work mentioned under text-books is read. In second year grammatical study is completed, conversational exercises are continued, and some French classic or historical work is made the basis of advanced study.

MATHEMATICS.

The Course in Mathematics is coextensive with that in the majority of our best colleges. Although the study is considered as chiefly disciplinary, the aim throughout the Course is to acquaint the Student with the instruments in most familiar use by the practical scientists and mathematicians of the day, as well as to strengthen his mental faculties and increase his logical acumen. At the commencement of each subject a familiar lecture is given on its history and practical utility.

Four terms are given to Algebra. The aim of the instruction in advanced Algebra is to free the Student from his previous dependence upon the text-book, and to cultivate ability and taste for original mathematical work. Great stress is laid upon mathematical generalization and the concise demonstration of principles.

Two terms are given in Geometry, embracing both the Plane and Solid.

One term is given to Plane Trigonometry and one term to Surveying, the latter combining theory and practice.

One term is spent in Analytical Geometry, and one term each in Differential and Integral Calculus.

HISTORY AND RHETORIC.

In the study of History the object is to familiarize the Student with the main facts and principles, thus forming a foundation on which to build by future reading and investigation. To this end the text-book is thoroughly studied in connection with a Manual of Classical Antiquities and an Atlas, while at the same time the Student is encouraged to consult other authorities and bring in additional matter bearing on the subject. Recitation is by the analytical and topical methods.

Special attention is given to instruction in Rhetoric, on account of its great value to the Student. The principles of good writing are studied and analyzed with a view to their practical application.

During the last term much of the time is devoted to original productions in the various departments of literary composition, on themes assigned by the teacher. These productions are read before the class, where general criticisms are offered, after which they are handed to the teacher for more careful correction.

BY-LAWS.

1. During the hours of study the Students shall not be unnecessarily absent from their rooms.
2. At the time appointed to attend prayers, recitation, lecture, or other exercises, each Student shall repair *quietly and promptly* to the place designated.
3. At no time shall any Student loiter in the halls or about the doors, or indulge in jumping, wrestling, loud talking, whistling, or any unnecessary noise, OR USE TOBACCO IN THE BUILDINGS OR ON THE GROUNDS.
4. The students shall not be absent from their rooms at night or after the hour of study indicated by the ringing of the bell, nor shall they attend parties or mixed assemblies without permission from the President; nor shall they at any time visit hotels or other places of public resort, or on any occasion indulge in the use of intoxicating liquors.
5. All profane and indecent language, playing at games of chance, injuring the property of the Institution or of citizens, quarreling, fighting, the carrying of firearms, or other dangerous weapons, are strictly forbidden.
6. No Students shall leave the corporate limits of the city for a longer period than one hour, without permission from the President.
7. Each Student will be held strictly accountable for any damage he or she may cause to the Seminary property. Damages by unknown parties may be assessed on the School.
8. The teachers must at all times have access to the Students' rooms, and if it be judged necessary, the rooms will be cleaned at the expense of the occupants.
9. Cleanliness of person and apparel, and a gentlemanly and lady-like deportment must be observed by all.
10. No water, dirt, or other material shall be thrown from

any window in the building, or in the halls after they have been cleaned.

11. Students must have their rooms swept and in order, and lights extinguished at the established hours, when all must retire for the night.

12. No Student will be allowed to go bathing, boating, skating, fishing, gunning, or riding, without permission from the President.

13. The Students must not visit the kitchen, dining-room, or any other room, except their own, without permission.

14. The Sabbath must be strictly observed by all. Visiting or receiving visits will not be allowed. All must attend public worship twice during the day.

15. No lady shall at any time receive calls from gentlemen at her own room. Friends from a distance can see the ladies in the parlor.

16. The young ladies will not be allowed to leave the Seminary grounds at any time without permission; and the gentlemen will be restricted at the discretion of the Faculty.

17. No Student shall change his or her room, or place at the table, without special permission from the President.

18. No Student will be permitted to leave the School during the session without an express request from the parent or guardian, made to the President, and without the consent of the Faculty.

19. Any Student who, without just cause, shall fail to attend the examinations, will be considered under censure.

20. Permission to be absent from any exercise must be obtained, if possible, before the absence occurs.

21. No Student will be permitted to leave any class without the consent of the Faculty.

22. The ladies and gentlemen must not visit each other's apartments, walk or ride together, without permission, nor converse together from the windows.

23. Students from the neighborhood will not be permitted to visit home at such times as will interfere with the regular exercises of the School.

24. Any offending Student may be punished, according to the nature of the offense, by private or public reproof, suspension, dismissal or expulsion.

25. Students dismissed or expelled must leave the premises at once.

26. None but Students can attend the Society meetings nor shall the Societies meet together, unless by express permission of the President.

27. No special meeting of the Students shall be held at any time, nor shall any meeting of the Students or Societies continue later than 9.45 o'clock P. M., without permission of the President.

28. All persons visiting Students at the Seminary will be required to conform to the rules adopted for the government of the School. Visitors will be charged for boarding at the published rates.

29. Any temporary prudential regulation for the government of the School that the Faculty may see fit to adopt shall be equally binding with these By-Laws.
